# N/XT

## The intuitive and interactive tool for Real Estate that will change the way you present your project.

Touch, Look, and Feel. That's the essence of N/XT.  
Discover and present your project with a selection of tools that explain your project in the fullest detail.

N/XT offers endless possibilities - with unique performances on both scale model and plot view.  
From original viewpoints, seasons, day and nighttime to maps integration.  
In high-end quality, fully interactive, and integrated animations, branded elements and data visualizations.

## PARALLEL presents N/XT

A total new approach to how Real Estate developers, governments, architects, and other creators present and indulge their clients about new developments, future building plans, and in-depth building details.

From sun studies to animated visualizations and interactive floor slicers with rental and sales information to custom content that explains your project to its fullest potential.

# N/XT

## Abstract / high-end realistic integration

N/XT is available in both an abstract physical model and high-end realistic integration. Both themes offer several zoom levels to present your project on both urban, plot and interior scales.

Urban scale model with transit & routing, points of interest, integrated viewpoints and animations, development phasing and maps. Zoom-in levels are available for plot and interior scales.

With all the functions of the physical scale model, but integrated in a high-end 3D scan of the surroundings. This option is available in The Netherlands, large parts of the USA and all major cities around the globe.

# N/XT

## Endless possibilities

### High-end quality

Crisp, lots of detail, dynamic animations such as cars and pedestrians, and high-end real-time graphics, all while maintaining superb performance.

### Realistic integration

The new developed area or buildings neatly integrated in a realistic setting, often with our 3D scan of the area.

### Transit & routing

An overview of public transport and nearby highways. Routing animations show the distances on foot, by bike and by car to nearby POI's, airports and more.

### Integrated viewpoints

Navigate quickly through the project with a series of preset viewpoints. Up to 10 viewpoints can be added per zoom level.

### Maps integration

In the Urban zoom level, N/XT integrates a large city map with highlighted points of interest, such as parks, city centers and nearby towns.

### Scale model

An physical model on a pedestal. The city scale shows all information about city zoning, neighborhoods, points of interest, transit and routing.

### Points of interest

A clear overview and information about nearby amenities such as shops, supermarkets, bars and restaurants, leisure, offices and public spaces.

### Integrated animations

Enrich your presentation with preset integrated animations; easily accessible from the toolbar.

### Building phasing

Most developments are being built in several phases. N/XT offers a smart and interactive way to show every phase together with a short description.

### Neighborhood / Areas

An overview of residential, office and commercial areas, neighborhoods and urban regions.

## Missing anything? We create custom content.

### Project presentation

Ideal at sales and b2b events; N/XT offers an elaborate project presentation consisting of several slides and images; introducing the project to all newcomers.

### 3D visuals integration

Instead of an integrated gallery, all still visualizations are placed as an overlay with specific positions inside your project.

### Integrated floorplans

Integrated PDF floorplans and information about the rental and sales object. Multiple files and object information can be added per floor.

### Sustainability layers

Add all sustainability features of your project as an information overlay onto the project. Integrated animations and additional information can be added.

### Branding & styles

Change the look your N/XT project by adding custom fonts, brand information, and your project identity, such as colors and logos.

### 3DNL integration

The horizon is the limit: full integration with Cyclomedia 3DNL. A high quality 3D scan of the Netherlands.

### Interactive floor slicer

Slice through building floors and dive into integrated 3D visualisations, points of interest, and look at presets of furniture fitouts.

### Dynamic time/seasons

Live sun studies and an integrated dynamic system for the seasons. From spring to winter with added building and street lights after sunset.

### Street view

Immersive drag and drop. Move the camera to a desired location in the project, look around, and discover the project from a first-person's perspective.

### Send favorites by email

N/XT allows the user to take screenshots, save favorites and send selected information to their email address. No personal information is stored.

# N/XT

## Platforms

### INTERACTIVE PRESENTATIONS 55" - 86" SCREEN

Make an impact and present your N/XT project to a larger audience on a big touchscreen.

### DESKTOPS / LAPTOPS / TABLETS & PHONES

No touchscreen TV? No worries. N/XT works on desktops and laptops using your mouse and keyboard; Ideal for one-on-one presentations. All interactive functions remain the same.

### N/XT GO

Take N/XT to your sales event and amaze your potential buyers with a stunning furniture piece. N/XT GO is equipped with a 43" touchscreen and integrated desktop. All you need is a power connection.

We offer to rent the N/XT Go for your event, or you can order a custom and branded N/XT GO that fits the identity of your project.

N/XT: District U - Vlaardingen

N/XT: District West - Amsterdam
